

### INSTALLTION STEPS

1. Cut a hole as I showed in the instrument panel, and use screws to fix the gauge. To make sure you have at least 55mm(2-3/16") at the backside of panel to install the gauge.
2. Connect wires according to wire diagram, cable 1 for I , Note optional hook up for 24 volt applications.
3. Hook up only one of the gauge (red or yellow) light options.
